

myData tools:

arthritis dashboard

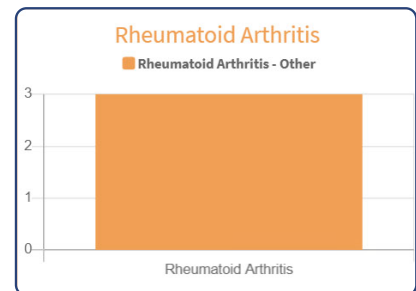

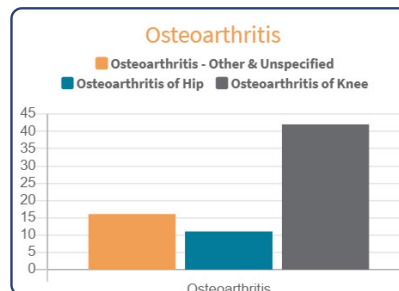

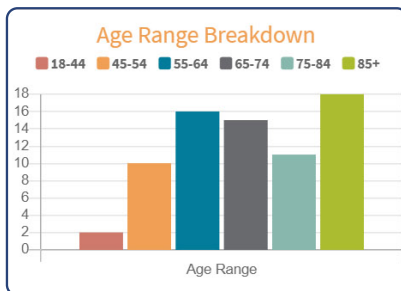

With data from the health information exchange, you can receive actionable and valuable insights on your patients admitted to a hospital or visited an ED within our application, myData.

myData is an innovative application that allows users to easily access and understand their patient profiles, identify gaps in care, and see how they rank in quality measures.

what's included in the myData arthritis dashboard?

- ✓ Easy access to lists of your patients with arthritis
- ✓ Data is presented by categories and subcategories of osteoarthritis and rheumatoid arthritis
- ✓ Lists can be filtered by age, BMI/obesity, depression, and subcategories

what can you do with this information?

refer patients to evidence-based programs

Improve patient outcomes by identifying patients with arthritis who could benefit from physical activity, lifestyle change, or chronic disease support and refer to community-based programs like:

- EnhanceFitness
- Walk with Ease
- Chronic Disease Self - Management Program

You'll be able to use our Community Referrals platform to make program referrals easily.

review HEDIS measure

Ensure patients receive recommended care by reviewing patients 18 years or older with a diagnosis of Rheumatoid Arthritis to see if they meet the HEDIS measure of being dispensed at least one ambulatory prescription for a DMARD (disease-modifying anti-rheumatic drug).

to learn more about our arthritis dashboard and how it can help your Health Department, send us a message at info@healthconnections.org or call us at 315-671-2241 x5.
