

# myData Tools: Arthritis Dashboard

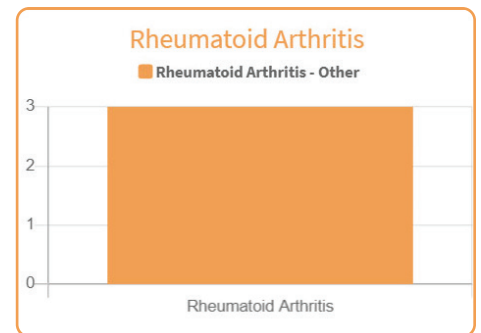

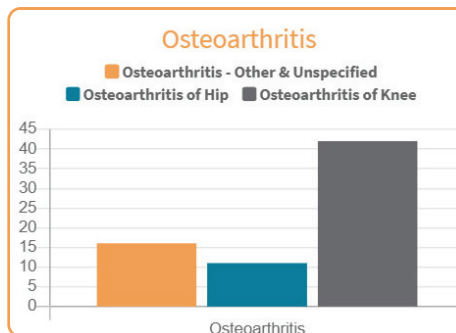

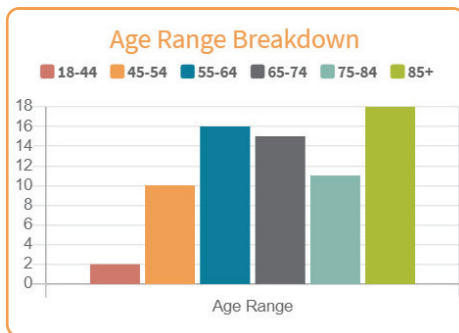

With data from the Health Information Exchange, you can receive actionable and valuable insights on your patients with osteoarthritis and rheumatoid arthritis right in our application, myData.

**myData** is an innovative application that allows users to easily access and understand their patient profiles, identify gaps in care, and see how they rank in quality measures.

## What's included in the myData Arthritis Dashboard?

- + Easy access to lists of your patients with arthritis
- + Data is presented by categories and subcategories of osteoarthritis and rheumatoid arthritis
- + Lists can be filtered by age, BMI/obesity, depression, and subcategories

## What can you do with this information?

### Counsel and refer patients to evidence-based programs

Improve patient outcomes by identifying patients with arthritis who could benefit from counseling on physical activity, lifestyle change, or chronic disease support and refer to community-based or online programs like:

- + EnhanceFitness
- + Walk with Ease
- + Chronic Disease Self - Management Program

You'll be able to use our **Community Referrals**

### Review HEDIS Measure

Ensure patients receive recommended care by reviewing patients 18 years or older with a diagnosis of Rheumatoid Arthritis to see if they meet the HEDIS measure of being dispensed at least one ambulatory prescription for a DMARD(disease-modifying anti-rheumatic drug).

To learn more about our Arthritis Dashboard and how it can help your organization, send us a message at [info@healthconnections.org](mailto:info@healthconnections.org) or call us at **315-671-2241 x5**.
