myData tools:

diabetes dashboard

With data from the health information exchange, you can receive actionable and valuable insights on your diabetes and prediabetes patients.

myData is an innovative application that allows users to easily access and understand their patient profiles, identify gaps in care, and see how they rank in quality measures.

what's included in this dashboard?

Review your patient's list using AHA/ACC guideline to identify patients with hypertension, including:

- ⊘ In control
- ⊘ Elevated levels
- ⊘ Poor control
- ⊘ Excludes those with ESRD and pregnancy

Also, view patients that may not be diagnosed with diabetes, but who fall in these categories:

- ⊘ Undiagnosed diabetes
- ⊘ Diagnosed prediabetes
- ⊘ Undiagnosed prediabetes

what can you do with this information?

filter and review patient lists

Manage your patients using filters that provide:

- Diabetes diagnosis
- Most recent HbA1c category
- HbA1c in the last year or 2 years
- HbA1c: the most recent date
- HTN: category
- Age range

how can this product improve your patient care?

help meet standardized measures by:

Creating a list of patients whose HbA1c is in poor control to review and manage their care

- Making a list of patients who have not had an HbA1c in the last year to bring into care
- Creating a list of your patients with either undiagnosed diabetes or prediabetes to review and confirm their diagnosis for care management

community referrals

Refer your diabetic patients to a lifestyle change chronic disease programs such as the Diabetes Self-Management Program (DSMP) or the Chronic Disease Self-Management Program (CDSMP) using our Community Referrals platform. For prediabetes, refer your patients to the National Diabetes Prevention Program (NDPP).
